

BeyondTV: Providing Guests With Ultimate In-room Convenience and Contactless Service Control With myRemote.

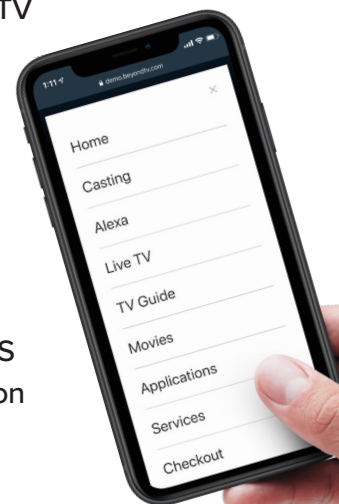

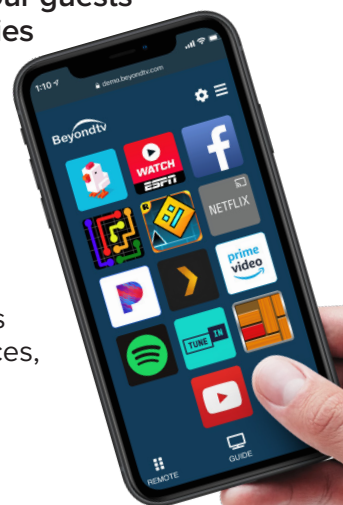

The myRemote Mobile web-app is an all new BeyondTV compatible feature offering contactless personal smart device control over the full range of BeyondTV functions and services. Ensure your guests can obtain total satisfaction with the convenience and personalization enhancing abilities of BeyondTV while reducing shared surface contact risks with myRemote including: controlling TV functions, accessing personal streamed content, communicating with staff, requesting amenities and much more.

Designed to be instantly accessible by a wide range of personal devices without the need to download software, myRemote is compatible with all smart devices. myRemote can be made available via QR code or manual registration and does not even require a Wi-Fi connection in order to function with BeyondTV. Replacing the prior need to handle physical in-room items such as TV remotes that may pose a germ exposure risk, BeyondTV's myRemote feature offers safer and hassle-free access to a wide range of traditional guestroom functionalities and services, enhancing guest confidence and trust while ensuring that their needs continue to be met.
