

GuestCast[®]

by Beyondtv[®]

Casting is what your guests are asking for!

The GuestCast[®] solution will boost guest convenience and in-room entertainment satisfaction. As the vast majority of guests increasingly look to video streaming services as the main source of television entertainment, hotels around the world are under pressure to deliver the advanced functionality that is increasingly expected by today's travelers. BeyondTV's GuestCast[®] platform caters to this need by allowing users to directly cast content from thousands of Apps. Leveraging a guest room's existing Wi-Fi connection, guests equipped with an iPhone[®], iPad[®], Android phone and tablet, Mac[®] and Windows[®] laptop can effortlessly and instantly make use of a larger screen.

GuestCast® was designed around three core concepts: guest security, ease of use, and simplicity to deploy and manage. We designed GuestCast® with device isolation so that there was no possibility of cross-room communication, where the guest was accidentally sending their content to the wrong room, or where someone with malicious intent could take over another's TV, yet that was quick and simple for guests to pair their device with, and which we could install in virtually any hospitality network environment with minimal requirements

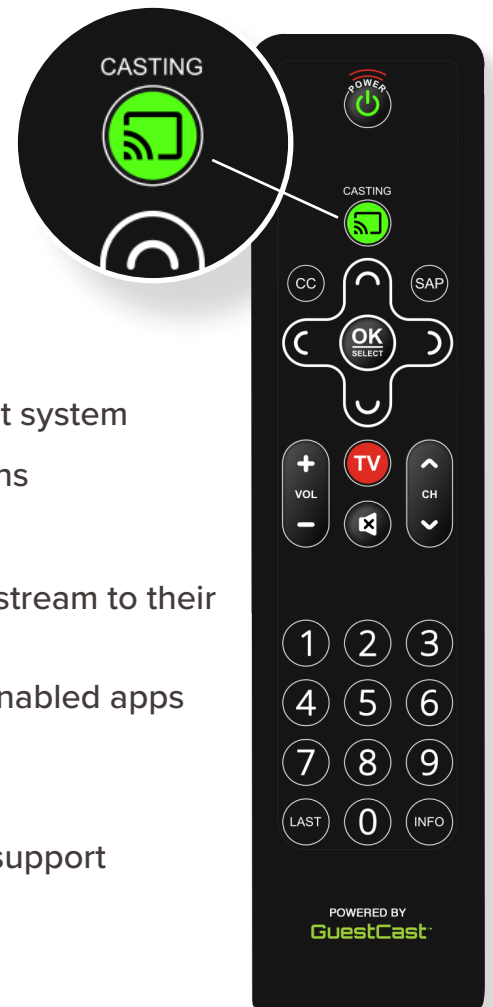

We recently surveyed over 700 guests about Casting and here is what they said when asked:

If you had a choice to watch Video-On-Demand movies via the guestroom TV or the ability to cast Netflix, Hulu, Disney +, Amazon Video, etc., to the TV from your own device, which would you prefer?

71% of guests answered that they wanted the ability to cast content from their own device on the guestroom TV.

- Enterprise grade hospitality solution
- Runs virtually on any network
- Easy to use cleanable backlit remote, one button for TV & Casting, prevents battery theft and has extra-long battery life
- Works with almost any hospitality TV
